SUMMARY

IT Business Analyst with 1.5 years running Salesforce Commerce Cloud delivery for PEDRO's e-commerce business across 20+ markets: gathering requirements, writing change requests, running UAT and coordinating releases between developers and regional teams. Computer Science graduate (NTU, 2025) who also works hands-on in the code, with HTML/CSS/JavaScript, Python, Playwright test automation and prior SAP/ABAP experience at NCS.

WORK EXPERIENCE

IT Business Analyst · Jul 2025 – Present

Charles & Keith Group (PEDRO) · Singapore

- **Business-facing lead:** IT BA for PEDRO's Salesforce Commerce Cloud e-commerce across 20+ international storefronts and the Vietnam/Indonesia (SF2) sites, completing 980+ tickets for 30+ stakeholders in marketing, CRM, UI/UX and regional ops.
- **Change management:** Raised and delivered 56 change requests with a team of 9 developers, from requirements through UAT and release. Work included Braze Content Cards, GA4 and Kakao tracking, and checkout compliance changes for Korea (customs ID) and Taiwan (age check).
- **Incident management:** Triaged and drove 24 production incidents and problems to resolution, including PayPal Express checkout failures, blocked pre-order checkouts and failed student account registrations.
- **Market launch:** Coordinated the Switzerland storefront go-live, covering currency and site setup, PayPal enablement, SEO configuration and staging UAT with the business.
- **UI delivery:** Took on front-end responsibilities beyond the BA scope, building 148 UI and content changes in HTML, CSS and JavaScript that turned design mockups into live homepage, editorial, mega menu and PLP/PDP components across 20+ storefronts.
- **Platform operations:** Ran SFCC catalog, pricing and inventory replication and 65 promotion setups, keeping a 1.2-day median turnaround (84% within a week) while monthly volume more than tripled.
- **Automation:** Built a Playwright regression suite covering checkout and key pages across 20+ storefronts to cut manual regression testing.

Data Analyst Intern (SAP Developer Team) · Aug – Dec 2023

NCS · Singapore

- Delivered 11 Change Requests in 17 weeks — averaging one CR per 1.5 weeks — across government digital services including Career@Gov and the Payroll Admin Portal, with zero rollbacks.
- Performed ABAP backend development and structured data management tasks within a large-scale enterprise SAP environment, gaining hands-on experience with government-grade systems and release processes.
- Self-managed workload with minimal supervision in a fast-paced delivery team.

Project Engineer · Apr – Jul 2019

Ngee Ann Polytechnic · Singapore

- Sole developer of a real-time multi-drone synchronisation system (Python + Packet Sender + Tello Edu SDK) demonstrated live to 30+ attendees at Innopoly Forum 2019.

EDUCATION

B.Comp. Computer Science · Aug 2021 – May 2025

Nanyang Technological University · Singapore

Diploma in Aerospace Electronics · Apr 2016 – May 2019

Ngee Ann Polytechnic · Singapore

TECHNICAL SKILLS

Business Analysis: Requirements gathering · Change requests · UAT · Bug triage · Release coordination · Jira Service Management · Figma (prototype review)

E-Commerce & Platform: Salesforce Commerce Cloud (SFCC) · SFCC Business Manager · Salesforce Service Cloud (Embedded Messaging) · GA4 · Google Tag Manager · Meta Events Manager & CAPI · Braze · SEO/AEO

Languages: Python · JavaScript (ES6+) · Java · C · HTML5 · CSS3 · ABAP

Frontend & Integrations: Splide.js · Vimeo Player SDK · Bootstrap · Playwright · PayPal · Google Pay · REST APIs · Flask

Data & Automation: Pandas · Plotly · DASH · Cytoscape · OpenCV · NLP · PyAutoGUI · tenacity · Google Sheets API · Llama LLM · GroqCloud

Enterprise / Backend & Dev Tools: SAP (ABAP) · Arduino · IoT modules · Packet Sender · Git · GitHub

SELECTED PROJECTS

E-Commerce QA Test Automation Tool *Python · Playwright · Tkinter · Pytest · JSON*

- Built a Playwright-based end-to-end QA test automation tool with a Tkinter UI launcher — covering registered and guest checkout flows, image asset validation, content text checks, PLP/PDP navigation, and megamenu verification across 20+ international storefronts.
- Designed a config-driven architecture with market presets, retry/readiness logic, and auto-generated test summaries, enabling non-technical QA users to run and interpret full regression suites without touching code.

COVID-19 Contact Network Analyser *Python · DASH · Plotly · Cytoscape · Graph Analysis*

- Simulated COVID-19 transmission across contact graphs under varying parameters to identify high-risk hidden spreaders; packaged insights into a DASH dashboard with live Cytoscape network visualisation and real-time parameter controls.

Computer-Vision GUI Automation Bot *Python · PyAutoGUI · OpenCV · Google Sheets API*

- Built a computer vision automation pipeline (screen capture → template matching → action dispatch) with fault-tolerant retry logic (tenacity) and live Google Sheets logging — reducing manual task time to near-zero.

Drone-based Mosquito Release System — NEA *Arduino · IoT · Hardware*

- Collaborated with the National Environment Agency to prototype an autonomous Wolbachia mosquito release payload, integrating Arduino microcontroller logic with IoT sensor modules.

ACHIEVEMENTS

Singapore Armed Forces (National Service) · 2019–2021

- Outstanding NSF of the Quarter (Q1 2021) — unit-wide recognition for leadership, initiative, and mentorship of junior servicemen in Basic Military Training.
- Appointed System Warfare Operator · Promoted to Corporal, Mar 2021.

Academic

- NP · Director's List (2017) · Edusave Merit Bursary (2017–2019) · Finalist, Lee Hsien Loong Smart Nation Award (2019)
